Blessings! My name is Bill Austin and I am a spiritual healer, teacher, artist, writer and visionary living in St Petersburg, FL in the United States. I have been on a spiritual path for over 18 years now and doing full time healing for the last six years. I partnered with Monica to create a series of Feng Shui healing manuals to assist her in downloading a heart paradigm version of Feng Shui.

Earth or Gaia as I call prefer to call her is going through a profound spiritual transformation right now as She shifts from the paradigm of the mind to the paradigm of the heart.

Since each human being is a cell in the body of Gaia we all are going through this profound transformation in consciousness as well. Most of humanity is out of sync energetically with the planet. Many people in this world are either sleeping or resisting change or some combination of both.

As the planet moves deeper and deeper into the Heart Paradigm, humanity will be challenged to shift and upgrade quickly. In a way humanity will have to go through an accelerated window of change because so many people have fallen behind. The images I created for this book help humanity to stay more in sync and balance with the planet. It is one way to help humanity to upgrade to the heart paradigm and to heal and harmonize their relationship with Gaia.

Feng Shui is perhaps the oldest spiritual healing modality on the planet and it has a lot of wisdom about how to live and work with energy in a harmonious and balanced matter.

One of the most important energetic relationships we have is with money. I created a series of Feng Shui healing images to assist people to clear, heal and transform the way they relate to money, abundance, prosperity and success.

By playing with these images, I hope that you will improve your relationship with Gaia and with money and upgrade the quality of your life.

Much self love, joy and mastery to each of you.

*Bill*

**Monica P. Castaneda** obtained her degree as an architect in Ecuador, South America. Upon moving to the United States she found she would not be allowed to practice unless she went back to school for four years. Instead, she devoted the last 9 years to study and research Feng Shui. She looked at all the schools and all the systems and sorted through the myths and superstitions to find out what was useful and applicable in the Western world of today. Monica is a Feng Shui consultant, speaker, and teacher.

Monica has made a commitment to teach only love. To learn more about Monica please visit:

There is much to be upset, in modern times, about the current condition of the world. Wars, pollution, politics, genetic manipulation... you name it.

With the *Feng Shui Cures for the Planet and Money Clearing Manual* Bill Austin and I ask that rather than focusing on the problems of the world, you put your energy and your attention on the good things in life.

Rather than getting angry at governments or corporations, we ask you that you send them love, and pray for the changes that need to happen within these organizations and institutions so that they can align with Highest Good. Do not get mad at them, for they are expressions of your own consciousness. We all share a responsibility for the condition of the planet, with the choices we make, the companies we patronize, the programs we watch and even the stock we buy.

We ask that rather than getting overwhelmed, fearful or obsessed with conspiracy theories you work at raising your own vibration and the vibration of that portion of the planet you are responsible for... your home, your workplace, and the people, animals and plants you come in contact with.

So much of what is wrong in the world right now is caused by greed and other unhealthy attitudes towards money, that Bill and I decided we should add a money clearing section to this book. The money healing images were created based on the nine principles of traditional Chinese philosophy, which are also the basis of Feng Shui.

*Monica P. Castaneda*

## Red Envelope Tradition

In Feng Shui, Red Envelopes are used to enhance Luck, Prosperity and Happiness.

The red envelope is a blessing for the money and for the people exchanging it. It carries the intention that the money multiplies for both the person giving and the person receiving the money. It transmutes the emotional pain people can feel when letting go of money into joy instantaneously. The payment becomes the planting of seeds in the Universal Field of Unlimited Gifts.

The symbolism of the color red is very important. Red is the most yang color, yang means strength, glue, keeping things together. Red is the color of fire. Fire is the only element that is able to transmute things because it is the most heavenly thing we have on Earth. We could call fire the "love from heaven," that protects and keeps things together. Usually, when protection is involved in a Feng Shui cure the color red is used. Please go to <http://www.fengshuiforus.com/books/gaia/redenvelope.html> to download a template to print out your own red envelopes with the encoded image.

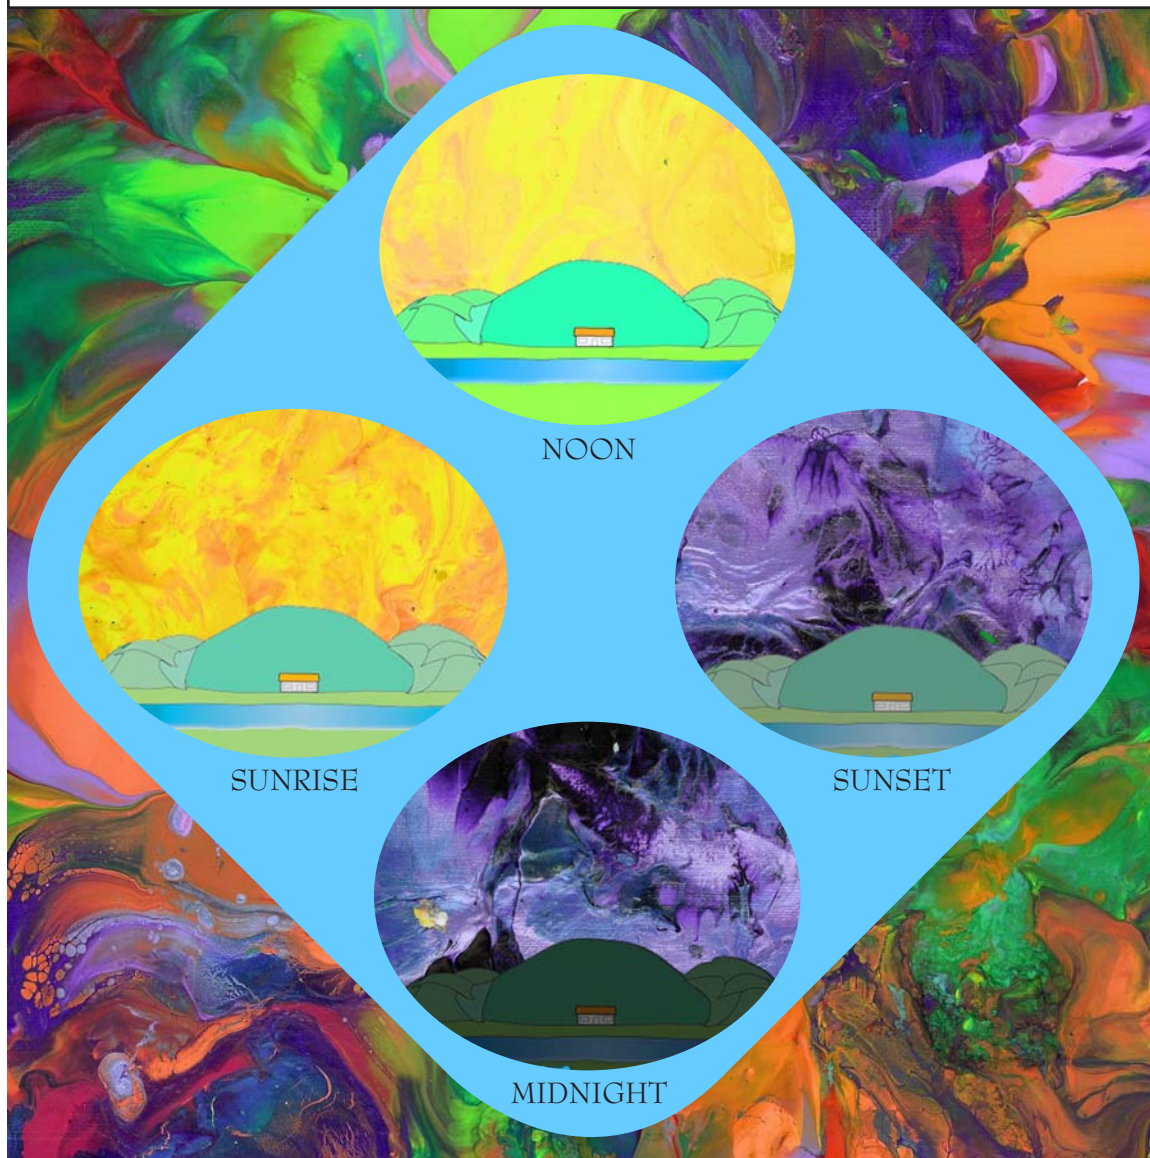

# Fantasy & Myth

Use these images to heal, balance and harmonize thoughts, feelings and beliefs regarding Earthly fantasies and myths and our relationship to the magic aspects of the world.

# Day and Night: The Circadian Rhythm

Use this image to help yourself attune to the rising, expanding, receding and halting energies contained in the day/night cycle for maximum energy, healing and rejuvenation.

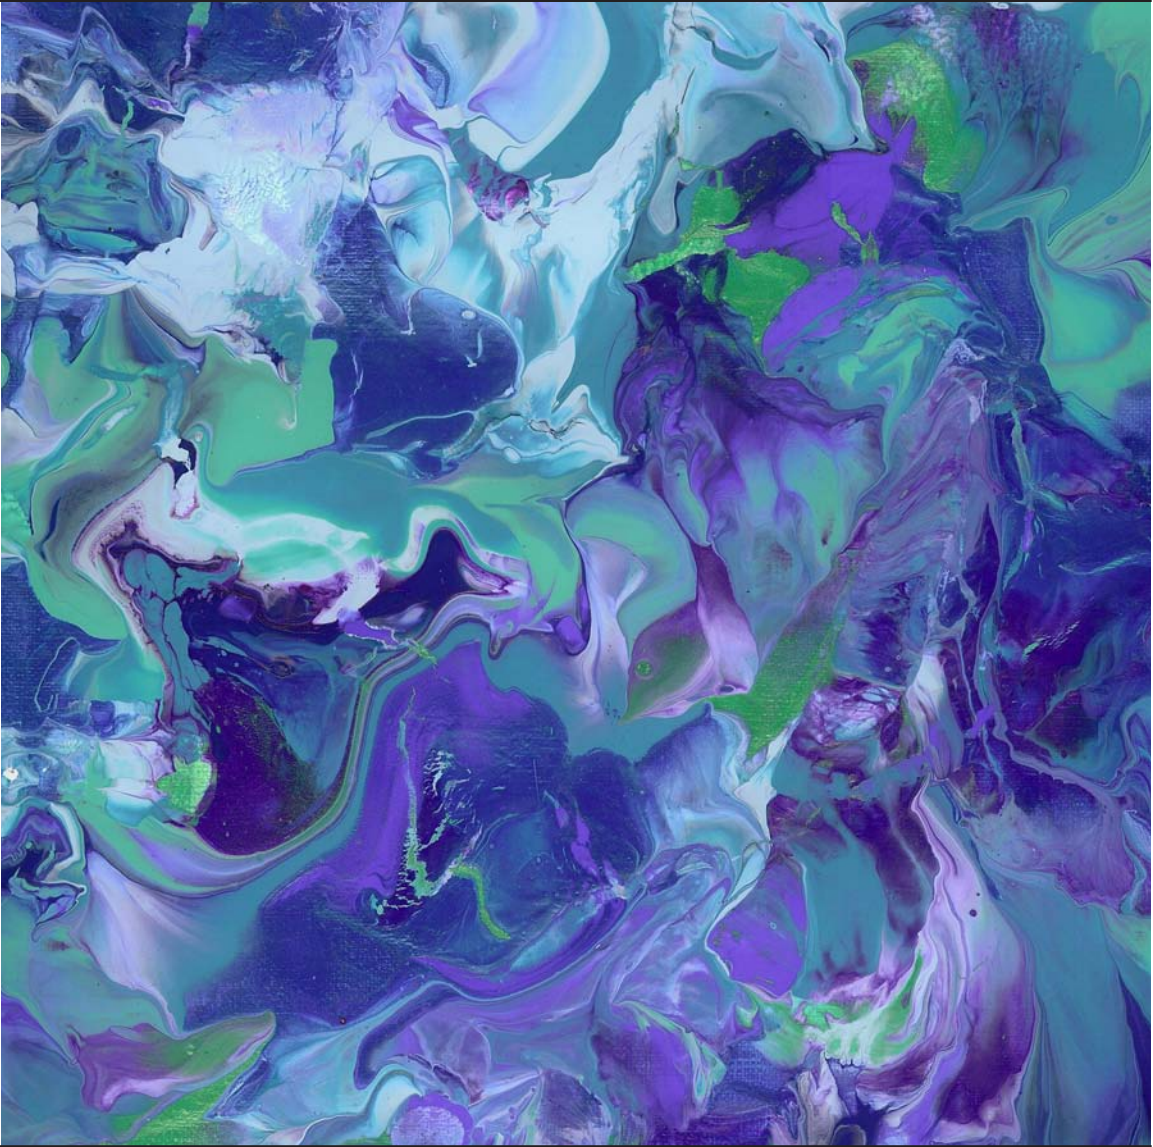

## Balance Between the Lands & the Water

Use this image for the general healing and well being of the planet and all its inhabitants. In the past, monuments were created all over the world to stabilize and anchor positive energies in the planet. Now is the time for every person in the world to anchor these energies in their hearts.

## The Rhythm of Money

Tune into the waters of the world to understand the nature and behavior of money. Learn to make money out of trust in a spiritual force (like water comes out of metal by condensation, in Feng Shui spiritual matters are related to the metal element, and money matters to the water element).

# The Power of Money

This image has been designed to deepen the wisdom, intuition and gut feelings around the issue of where to put money. Allocate money appropriately before it comes in, so it goes to the right places. Relate with money from a place of power.

## Clearing Feng Shui Superstitions

Over the years Feng Shui has been adopted by many cultures and intertwined with knowledge and beliefs from those cultures. Some of these additions have been good, while some have been dis-empowering and fear inducing, in other words, superstitious. Use this image to help clean yourself and your loved ones from negative, dis-empowering and fear based beliefs regarding Feng Shui.
